

Product information The Zwitserleven Nu Pensioen

This product information is valid for administration agreements commencing on or after 1 July 2022. Zwitserleven and Zwitserleven PPI reserve the right to change this product information at any time.

An employee invests his or her defined contribution. The portion invested is placed with Zwitserleven PPI NV. The death risk and the occupational disability risk are insured with Zwitserleven. No charges are withheld from the defined contribution. The risk premium and other charges are always funded by an additional charge in addition to the investment premium. An employer may give its employees the opportunity to opt for the ZekerheidZwitsch. With the ZekerheidZwitsch in ProfielBeleggen, as of 15 years prior to the standard retirement date, a part of the investments is withdrawn each month for the purchase of deferred pensions with the insurer Zwitserleven. This means that the participant already has certainty regarding his or her pension before the retirement date. Participants having the option of VrijBeleggen can convert part of their value of plan assets themselves. The asset mix of ProfielBeleggen aligns with a choice for either a variable or a fixed pension benefit.

Target Market	Zwitserleven Nu Pensioen is suitable for employers who: <ul style="list-style-type: none"> • wish to offer a pension scheme with budgetable costs. • wish to offer a pension scheme that can be cancelled at any time. • accept that the investment risk is borne by their employees. • wish to offer options to their employees such as supplementary pension insurances, investment choices and PensioenAanvullen. • are not subject to mandatory participation in an industry pension fund • wish to offer a pension scheme that does not affect the balance sheet. This usually concerns listed companies which report according to IFRS or US GAAP.
Pension scheme type	Defined contribution scheme (defined contribution agreement).
Graduated scale for investment premium	<ul style="list-style-type: none"> • Ministry investment scales: The Ministry of Finance regularly publishes new fiscal maximum net defined contribution scales based upon 3% and 4% actuarial interest. • Cost price scales (market interest scales). These scales are based on an interest rate of 0.5%, 0.75%, 1%, 1.5%, 2% and 2.5% respectively. <p>Should one require one of these scales, conditions may be in place.</p>
Height of scale	Any desired percentage up to and including 100% of the chosen scale. A level percentage defined contribution is possible.
Minimum premium	No minimum premium
Entry age	18, 20 or 21 years of age.
Reference date	1 January.
Standard retirement date	The first day of the month in which the participant reaches the retirement age (standard 68 years). In case of a net graduated scale based upon an actuarial interest rate of 3% or 4%, a standard retirement date of 67 years is also possible.
Payment instalment	Monthly in advance
Payment method	Contributions are invoiced to the employer (on request: by direct debit).
Contract term	No contract term. A choice can be made between 'en bloc' or rate guarantee. En bloc is mandatory for contracts with a premium volume until € 50,000. Rate guarantee is mandatory for contracts with a premium volume above € 300,000.
Notice period	2 months.
Changes	In the case of 'en bloc', Zwitserleven PPI can change the agreement and the appendices without the employer's consent. We can then change the rates and the conditions. In the case of a 'rate guarantee', the rates are fixed for a pre-agreed period. If we cancel or change the agreement, the employer will be informed about this at least 4 months before the cancellation/change.

COVER

Old-age pension and partner's pension after the retirement date

On the retirement date, the available pension capital is used to purchase a lifelong old-age pension and a lifelong partner's pension. The participant can opt for a fixed pension benefit, a variable pension benefit or a combination of the two. If the participant has opted for the ZekerheidZwitsch, he or she receives the purchased fixed (guaranteed) old-age pension monthly as of the retirement date. The purchased partner's pension is paid to the partner if the participant dies after the retirement date. Further information on the ZekerheidZwitsch is provided below in this product card.

Payment of the value of plan assets on death

There is an option to use the value of the plan assets of participants who die during active employment or a period of occupational disability for indexation of the partner's and orphan's pension. We pay the value of the investments to the surviving dependant(s). The surviving dependant(s) is/are obliged to use this to purchase a pension. If there are no surviving dependants, the value reverts to Zwitserleven PPI.

There is also the option of having the accrued value on death revert to Zwitserleven. In return, the participant or inactive participant receives a monthly reimbursement in the form of negative risk premiums. These are added to the value of the plan assets, which increases as a result.

If a participant or inactive participant has opted for the ZekerheidZwitsch, deferred old-age pension and partner's pension is purchased starting 15 years prior to the retirement date. As a result of these purchases, the value of the plan assets will be reduced as the retirement date approaches. If a participant dies before the retirement date, a part of the partner's pension after the retirement date has already been purchased. This reverts to the insurer.

Partner's and orphan's pension prior to the retirement date

- The partner's pension and orphan's pension are mandatory and are insured on the basis of 'unspecified partner'. The tariff used is gender-dependent.
- The insurance premium is charged to the employer in addition to the pension contribution.
- The amount of the partner's pension is:
 - Final pay up to and including 1.16% of the pensionable earnings per year of service.
 - Average pay up to and including 1.313% of the pensionable earnings per year of service.
- The orphan's pension is 20% of the partner's pension.
- The age of maturity of the orphan's pension is 18 or 21.
- Sometimes orphan's pension is paid after the maturity age. We do this if at maturity age a Wajong benefit is received by the orphan. We pay out orphan's pension as long as the child is receiving this Wajong benefit and until a maximum age of 27. Does the orphan study before or after the maturity age? Orphan's pension is being paid out as long as the child is studying and until the maximum age of 27.
- The orphan's pension benefit is doubled for full orphans.
- The partner's and orphan's benefit can be insured at constant level, or rising annually after coming into payment by 1%, 2% or 3%.
- If the employer opts for negative risk premiums, on leaving employment of the participant it is possible to continue to insure a part of the partner's pension for the partner. Monthly risk premiums are deducted from the value of the plan assets for this.

Surviving dependants' bridging pension (NOVP)

- The employer decides whether the NOVP is mandatory or voluntary. If the cover is voluntary, the full premium is paid by the participant.
- The insurance premium is charged to the employer in addition to the pension contribution.
- If the NOVP is mandatory, it is insured on the basis of 'unspecified partner'. The tariff used will then be gender-dependent.
- If the NOVP is voluntary, it is insured on the basis of 'specified partner'. The tariff used will then be gender-neutral.
- The employer may choose from:
 - 87,5% from 8/7ths of the Anw benefit (€ 16,201.20 in 2022).
 - 100% from 8/7ths of the Anw benefit (€ 18,515.66 in 2022).
 - a percentage from 2% up to and including 100% of 8/7ths of the Anw benefit.
 - an insured sum of € 10,000.
- The NOVP benefit can be insured at constant level, or rising annually after coming into payment by 1% or 2%. In case of a 2% increase, a maximum insured amount of 87,5% from 8/7ths of the Anw benefit (€ 16,201.20 in 2022) applies. Higher amounts with maximum 1% rising annually after coming into payment.
- The NOVP cover terminates no later than the participant's retirement date.
- Payment of NOVP benefit terminates on the date on which the participant's partner becomes eligible for state pension (AOW).

Waiver of contribution in case of occupational disability (PVA)

- All policies include cover for waiver of contribution payment in case of occupational disability (PVA).
- The degree of occupational disability is established by the UWV.
- The amount of the PVA mark-up depends on the 'pitch' of the graduated scale for investment premium. In the maximum scale it is 3.5%. More information is provided in the document 'Technical principles'.
- The assessment is made using the six-class system (according to the WIA).

Degree of occupational disability	The percentage of the contribution to be paid by Zwitserleven
80% or more	100.0%
65% - 80%	72.5%
55% - 65%	60.0%
45% - 55%	50.0%
35% - 45%	40.0%
Less than 35%	0.0%

Occupational disability pension (AOP)

- If the partner's pension and orphan's pension are insured on the basis of 'unspecified partner', an occupational disability pension can be insured as well.
- If the employer chooses to insure an occupational disability pension (AOP), this cover will be mandatory for the participants.
- The assessment is made on the basis of 'prevailing labour', using the six-class system (according to the WIA). The degree of occupational disability is established by the UWV.
- The amount of the occupational disability pension is 70% above the WIA salary threshold and/or 10% or 20% under the WIA salary threshold. The maximum occupational disability pension above the WIA salary threshold is € 150,000.
- Occupational disability benefit can be insured at constant level, or rising annually after coming into payment by 1%, 2% or 3%.

PensioenAanvullen

- The employer decides whether the participants are allowed to supplement their pension (with PensioenAanvullen).
- PensioenAanvullen can be with monthly contributions or lump sum contributions.
- The employer decides whether waiver of contribution in case of occupational disability (PVA) can be insured for PensioenAanvullen.
- The PVA mark-up is based on an age-related rate table. More information is provided in the document 'Technical principles'.
- Does a participant opt for ZekerheidZwitsch? Then the ZekerheidZwitsch automatically also applies for the capital accrued with PensioenAanvullen.

INVESTMENTS

Options for the employer

The employer can choose between various investment methods. The following combinations are possible:

- HorizonBeleggen with the option of ProfielBeleggen.
- HorizonBeleggen with the option of ProfielBeleggen and VrijBeleggen.

The substance of the various investment methods is explained below.

If you would like to know more about this, please visit zwitserleven.nl/beleggingsvormen.

HorizonBeleggen

The standard option for the participant is to invest according to HorizonBeleggen. The participant does not have to make investment choices. Zwitserleven PPI is responsible for the reduction of risk (also known as prudent investing). With HorizonBeleggen, Zwitserleven PPI reduces the risk of the investments as the standard retirement date approaches.

ProfielBeleggen

With ProfielBeleggen, we ask the participants to define his or her investor profile using a questionnaire. More or less investment risk is incurred, depending on the outcome. This ranges from cautious to offensive. It also depends on the preparation for a fixed or variable pension. Here too (depending on the profile), the investment risk is reduced as the standard retirement date approaches. The asset mix of ProfielBeleggen aligns with a choice for either a variable or a fixed pension benefit.

VrijBeleggen

With VrijBeleggen, the participant chooses his or her own investments. After establishing an investor profile, the participant may invest in one or more investment funds.

Rebalancing

Zwitserleven uses bandwidths. We adjust the moment a bandwidth is hit. This bandwidth is 15% relative. This means that if a fund represents 50% of a life cycle, we adjust if the weight of this fund has decreased or increased by 7.5%. There may be rebalancing in HorizonBeleggen and ProfielBeleggen. Which is 1x per month as a maximum. Rebalancing is only carried out if a fund deviates more than 15% from its strategic allocation at that moment in the month.

ZekerheidZwitsch

The purchase of a deferred fixed (guaranteed) pension is known as the ZekerheidZwitsch. With ProfielBeleggen with the ZekerheidZwitsch, the participant or inactive participant purchases a fixed pension, starting 15 years before his or her standard retirement date. From that time on until the retirement date, each month a new amount of old-age and

partner's pension for after the retirement date is purchased (unspecified partner system). The percentage of the value of the plan assets used for the purchase of fixed pensions depends on the participant's profile. This gives the participant greater certainty with respect to the amount of his or her pension as the retirement date approaches. Also, the reduction of the investment risk is adjusted according to the preference for a variable or fixed pension benefit after the retirement date.

The amount of this pension depends significantly on the rates (in which interest rates are an important factor) at the time of purchase of the guaranteed pension. And on the average life expectancy at that time. The monthly spreading of the purchase of pension means that employees are less dependent on the level of interest rates on their retirement date. If interest rates fall, there will be more pension than if the pension is purchased in one go on the retirement date. If interest rates rise in the years immediately before the retirement date, the pension from the ZekerheidZwitsch will however be lower than if the pension is purchased in one go on the retirement date.

The same applies to the average life expectancy. If people are living longer, spread purchasing will be more favourable. If people live shorter on average, it may be better to wait to purchase the pension until the retirement date. Interest rate developments and the average age at which people die may influence the level of pension on the retirement date.

Participants with VrijBeleggen can convert part of their value of plan assets themselves. The initial contribution is subject to a minimum of € 20,000. No minimum applies to subsequent contributions. Subsequent contributions are permitted one year after the initial contribution. No minimum applies at this point and there is also no minimum interval between subsequent contributions.

For further details, please visit zwitserleven.nl/zekerheidzwitsch.

Preparing for Direct Ingaand Variabel Pensioen

The asset mix of ProfielBeleggen aligns with a choice for either a variable or a fixed pension benefit or a combination of the two. As of 15 years prior to the standard retirement date, the participant or inactive participant can make preparations for receiving a variable pension as of his or her standard retirement date. If on the retirement date the participant or inactive participant chooses to continue investing, he or she has a chance of receiving a higher pension. But he or she will also incur risk for longer.

Moments of choice for the participant

A participant has two major moments of choice:

- The participant is contacted by Zwitserleven 15 years before his/her standard retirement date, and is offered the option of the ZekerheidZwitsch and to prepare for a variable pension. The participant is free to join or leave at a later date. The fixed pension purchased with the ZekerheidZwitsch remains in effect.
- On his or her retirement date, the participant can make a final decision regarding a fixed or a variable pension benefit.

Direct Ingaand Variabel Pensioen with Zwitserleven

With a variable pension, the amount of the pension benefit each year is adjusted according to the realised return. If the return is better than expected, the participant receives a higher pension. If the return is lower than expected, the pension benefit will be reduced.

Further information for employers is available at zwitserleven.nl/profielbeleggen.

SERVICE CHARGES EMPLOYER

The service charges are invoiced monthly. The employer pays the service charges for:

- the participants for whom an investment premium is due, and
- participants who are fully or partially incapacitated for work and in the service of the employer.

The monthly service charges are € 65 per year per participant (spread over 12 months).

Customised pricing

In case of a contribution volume (defined contribution and risk premiums, excluding service charges) of more than € 150,000 we will be happy to prepare a specific proposal for you. Your account manager will be pleased to arrange this.

INVESTMENT COSTS Fund charges

The total investment costs consist of 'management fees' which are paid out of the value of the plan assets, and the 'total expense ratio' (TER) which is included in the unit price of a fund. Purchase and sale costs for transactions are included in the transaction price.

With **HorizonBeleggen** and **ProfielBeleggen**, we invest in the following funds:

Fund	Total fund charges
Zwitserleven Wereld Aandelenfonds	0,54%
Zwitserleven Credits Fonds	0,54%
Zwitserleven Selectie Fonds	0,69%
Zwitserleven Medium Duration Fonds	0,54%
Zwitserleven Long Duration Fonds	0,54%

The following funds are available with **VrijBeleggen**:

Fund	Total fund charges	Fund	Total fund charges
Zwitserleven Wereld Aandelenfonds	0,54%	Zwitserleven Duurzaam Index Aandelenfonds Pacific	0,52%
Zwitserleven Index Wereld Aandelenfonds	0,52%	Zwitserleven Duurzaam Index Aandelenfonds Opkomende Landen	0,52%
Zwitserleven Credits Fonds	0,54%	Zwitserleven Impact Wereld Aandelenfonds	0,60%
Zwitserleven Selectie Fonds	0,69%	ASN Milieu & Waterfonds	1,60%
Zwitserleven Vastgoedfonds	0,54%	ASN Duurzaam Obligatiefonds	0,85%

More information on the funds and the fund charges is included in the Essentiële Beleggingsinformatie (Key Investor Information Document) and the fund Prospectus (see [zwitserleven.nl/fondsen](https://www.zwitserleven.nl/fondsen)).

Switch costs

No service charges are charged for processing a switch.

OTHER CHARGES

Divorce

No costs are charged for processing a divorce.

Transfer of accrued benefits

- No costs are charged for an **individual** transfer of accrued benefits.
- In case of a **group** transfer of accrued benefits, the costs are charged in two parts:
 1. The costs for preparing our offer are:
 - Number of policies involved x € 32.64 (2022).
 - Minimum € 326.
 - Maximum € 3,264 (2022).
 2. For processing in our administration:
 - Number of policies to be transferred x € 13.06 (2022).
 For more information, please visit [zwitserleven.nl/diensten](https://www.zwitserleven.nl/diensten).

Hourly rate

We agree in advance on what work we will do. If we have not agreed, the employer pays € 130.57 (2022) per hour. We index this amount annually. The basis for the indexation is the average increase in the consumer price index figure and the index figure for the CAO wages. For more information, please visit [zwitserleven.nl/diensten](https://www.zwitserleven.nl/diensten).

TECHNICAL PRINCIPLES

Age adjustment when alive

Participant: -3 years, if a choice has been made for negative risk premiums and not applicable with 100% Return.

Mortality table

- Gender-dependent:
- Participant: ZL 2020 gender-dependent for males/females
 - Partner: ZL 2020 gender-dependent for males/females.
- Gender-neutral:
- Participant: ZL 2018 gender-neutral for the participant
 - Partner: ZL 2018 gender-neutral for the partner.

Age adjustment on death	<ul style="list-style-type: none"> • Mandatory covers (unspecified partner, gender-dependent tariff): <ul style="list-style-type: none"> o Participant: Age correction 0 years. o Partner: Age correction -1 year. o Female relative to male: Fictional age difference -2 years (we assume, for insurances of partner's pensions, that a male is 2 years older than a female. This also applies when the male is the main insured person, as well as when the female is the main insured person). • Voluntary covers (specified partner, gender-neutral tariff): <ul style="list-style-type: none"> o Participant: Age correction +1 year o Partner: Age correction -1 year. o Partner relative to participant: Fictional age difference -2 years (we assume, for insurances of partner's pensions, that the main insured person is 2 years older than the partner).
Interest	<p>The setting of the premium for partner's, orphan's and surviving dependants' bridging pension is based on a guaranteed actuarial interest rate of 2.5%.</p> <p>The premium is adjusted by the Yield Correction. The Yield Correction depends on the market interest rate (the 20-year Euro Swap bid rate).</p>
DEFERRED PENSION	
ZekerheidZwitch Mortality table	ZL 2016 uitgesteld pensioen (UP) for the participant.
Age correction participant	None.
Gender-neutral	The partner is two years younger than the participant.
Gender-dependent	The male is two years older than the female.
Market interest rate	Euribor bid rate swap curve +0.20%.
Solvency	0.20% margin on the market interest rate.
Management fees	0.15% margin on the market interest rate.
Disbursement expenses	1.5% mark-up.
Distribution strategy	<p>The Zwitserleven Nu Pensioen is a complex product and requires advice. An employer should therefore take proper advice to determine whether the Zwitserleven Nu Pensioen is the most suitable choice. To this aim, Zwitserleven works with professional, independent advisers. They are able to assess whether the Zwitserleven Nu Pensioen is suitable for the employer and its employees.</p> <p>An adviser will only offer this product to parties outside the target market if he or she can substantiate that this product is suitable for the employer and its employees.</p>
